

WICOVALVE[®] W606 and W616 - the all-rounder for heat-sealing

With the WICOVALVE[®] W606 and W616, we expand the compatibility to cover a wide range of machines. The interchangeability of the W606 and W616 valves on existing packaging machines applying a valve with the same dimensions is a genuine drop-in replacement (no mechanical modifications are needed).

The valves are made of high-quality components and materials and are guaranteed to operate perfectly at all times. In periods du-

ring which the product does not degas, and after completion of the degassing phase, the valves close tight to protect the product. The valves are exceptionally rugged; with respect to consistent integrity and functionality, they are guaranteed for a period of three years.

We would be happy to advise you personally and develop the best possible solution for your application. Contact us!

Product overview

Typical application

W606 Bean coffee
W616 Ground coffee and bean coffee

Body material

Polyethylene

Filter

W606 without filter
W616 with filter

Colour

Brown

Pressure level

3.0 - 7.0 mbar
The opening pressure fluctuation range is very narrow (± 2 mbar)

Dimension
